

# **Topic: Evaluating investment effectiveness in seafood exploiting activities in Ba Ria- Vung Tau**

**Sign:** LC 276

**Author:** Tran Anh Tuan

**Major:** Business Administration

**Year:** 2007

**Lecturer:** Dr. Ta Duc Khanh

## **Research purposes:**

- Evaluating the situation of most effective investments in seafood exploitation in Ba Ria- Vung Tau, determining the sectors to encourage investment for best results
- Determining the factors that affect mainly the production and yield in order to encourage people to invest appropriately and effectively
- Offering leads to exploit seafood effectively and steadily in the future.
- Suggesting solutions regarding capital investment, technology, human resources and setting them at high priority in order to create job opportunity in the area of seafood exploitation with steady and long-lasting success. For the less effective jobs, they will be gradually and carefully downsized at reasonable rate to change into more effective jobs aiming at stabilizing workers' life.
- Suggesting improvements related to regulations, fishing management policies to encourage people participating in fishing community management to develop and preserve seafood resources.

## **New contributions:**

- Systematizing and improving the process of evaluating investment effectiveness in seafood exploiting activities.

- Evaluating the situation of investment effectiveness in seafood exploiting activities in Ba Ria-Vung Tau.
- Providing guidelines for the local authorities at Vung Tau to make decision on the best seafood exploiting investment sectors.
