Contents

Preface	xi
Part 1 Introduction	
1. Introduction: Purposes and Limitations of Statistics	3
1.1 Functions of Statistics	4
1.2 The Place of Statistics in the Research Process	7
1.3 A Word of Advice	8
2. Theory, Measurement, and Mathematics	11
2.1 Theory and Hypotheses: Operational Definitions	11
2.2 Level of Measurement: Nominal, Ordinal, and Interval Scales	15
2.3 Measurement and Statistics	20
2.4 Organization of the Book	25
Part 2 Univariate Descriptive Statistics	
3. Nominal Scales: Proportions, Percentages, and Ratios	31
3.1 Proportions	31
3.2 Percentages	33
3.3 Ratios	36
4. Interval Scales: Frequency Distributions and Graphic Presentation	41
4.1 Frequency Distributions: Grouping the Data	41
4.2 Cumulative Frequency Distributions	47
4.3 Graphic Presentation: Histograms, Frequency Polygons, and Ogives	48
5. Interval Scales: Measures of Central Tendency	55
5.1 The Arithmetic Mean	56
5.2 The Median	59
5.3 Computation of Mean and Median from Grouped Data	61
5.4 Comparison of Mean and Median	68

5.5 Other Measures of Central Tendency	72
5.6 Deciles, Quartiles, and Percentiles	73
6. Interval Scales: Measures of Dispersion	77
6.1 The Range	77
6.2 The Quartile Deviation	79
6.3 The Mean Deviation	79
6.4 The Standard Deviation	80
6.5 The Coefficient of Variation	88
6.6 Other Summarizing Measures	88
7. The Normal Distribution	93
7.1 Finite versus Infinite Frequency Distributions	93
7.2 General Form of the Normal Curve	96
7.3 Areas under the Normal Curve	99
7.4 Further Illustrations of the Use of the Normal Table	102
Part 3 Inductive Statistics	
8. Introduction to Inductive Statistics	109
8.1 Statistics and Parameters	109
8.2 Steps in Testing an Hypothesis	110
8.3 The Fallacy of Affirming the Consequent	112
8.4 The Form of Statistical Hypotheses	114
9. Probability	119
9.1 A Priori Probabilities	120
9.2 Mathematical Properties of Probabilities	124
9.3 Permutations	135
9.4 Expected Values	141
9.5 Independence and Random Sampling	142
10. Testing Hypotheses: The Binomial Distribution	151
10.1 The Binomial Sampling Distribution	151
10.2 Steps in Statistical Tests	155
10.3 Applications of the Binomial	166
10.4 Extensions of the Binomial	170
10.5 Summary	173
11. Single-sample Tests Involving Means and Proportions	177
11.1 Sampling Distribution of Means	177
11.2 Test for Population Mean, σ Known	184
11.3 Student's t Distribution	188
11.4 Tests Involving Proportions	193
12. Point and Interval Estimation	201
12.1 Point Estimation	202
12.2 Interval Estimation	205

12.3	Confidence Intervals for Other Types of Problems	211
12.4	Determining the Sample Size	213
Part 4 Bivariate and Multivariate Statistics		
13.	Two-sample Tests: Difference of Means and Proportions	219
13.1	Difference-of-means Test	220
13.2	Difference of Proportions	228
13.3	Confidence Intervals	232
13.4	Dependent Samples: Matched Pairs	233
13.5	Comments on Experimental Designs and Significance Tests	235
14.	Ordinal Scales: Two-sample Nonparametric Tests	243
14.1	Power and Power Efficiency	244
14.2	The Wald-Wolfowitz Runs Test	249
14.3	The Mann-Whitney or Wilcoxon Test	255
14.4	The Kolmogorov-Smirnov Test	262
14.5	The Wilcoxon Matched-pairs Signed-ranks Test	265
14.6	Concluding Remarks	269
15.	Nominal Scales: Contingency Problems	275
15.1	The Chi-square Test	275
15.2	Fisher's Exact Test	287
15.3	Measures of Strength of Relationship	291
15.4	Controlling for Other Variables	305
16.	Analysis of Variance	317
16.1	Simple Analysis of Variance	317
16.2	Comparisons of Specific Means	328
16.3	Two-way Analysis of Variance	334
16.4	Nonparametric Alternatives to Analysis of Variance	340
16.5	Measures of Association: Intraclass Correlation	354
17.	Correlation and Regression	361
17.1	Linear Regression and Least Squares	362
17.2	Correlation	376
18.	Correlation and Regression (Continued)	387
18.1	Significance Tests and Confidence Intervals	387
18.2	Nonlinear Correlation and Regression	408
18.3	The Effects of Measurement Errors	413
18.4	Ordinal Scales: Rank-order Correlation	415
19.	Multiple and Partial Correlation	428
19.1	Multiple Regression and Least Squares	428
19.2	Partial Correlation	435
19.3	Partial Correlation and Causal Interpretations	445

19.4	Multiple Least Squares and the Beta Coefficients	450
19.5	Multiple Correlation	454
19.6	Multiple Regression and Nonlinearity	459
19.7	Significance Tests and Confidence Intervals	464
20.	Analysis of Covariance and Dummy Variables	473
20.1	Relating Two Interval Scales, Controlling for Nominal Scale	474
20.2	Relating Interval and Nominal Scales, Controlling for Interval Scale	491
20.3	Extensions of Covariance Analysis	497
20.4	Dummy Variable Analysis	498
20.5	Concluding Remarks	502
Part 5	Sampling	
21.	Sampling	509
21.1	Simple Random Sampling	510
21.2	Systematic Sampling	514
21.3	Stratified Sampling	516
21.4	Cluster Sampling	523
21.5	Nonprobability Sampling	527
21.6	Nonsampling Errors and Sample Size	529
Appendix 1.	Review of Algebraic Operations	533
2.	Tables	541
Name Index		575
Subject Index		577
