CONTENTS

Preface xiii

1 INTRODUCTION: STATISTICS AND DATA 1

1.1 What Is Statistics? 2
1.2 Types of Data 3
1.3 Fundamental Elements of a Statistical Analysis 9
1.4 Collecting Data 16

CASE STUDY 1.1 The Executive Compensation Scoreboard 25
CASE STUDY 1.2 HMO Physicians: Cost-effective? 26

2 GRAPHICAL METHODS FOR DESCRIBING DATA SETS 27

2.1 The Objective of Data Description 28
2.2 Graphical Descriptions of Qualitative Data 28
2.3 Graphical Descriptions of Quantitative Data: Stem-and-Leaf Displays 39
2.4 Graphical Descriptions of Quantitative Data: Histograms 50

CASE STUDY 2.1 Warning: Cigarette Smoke Is Hazardous to Your Health 78
CASE STUDY 2.2 Statistical Quality Control: Fudging the Data 79

3 Numerical Methods for Describing Quantitative Data 80

3.1 Why We Need Numerical Descriptive Measures 81
3.2 Types of Numerical Descriptive Measures 81
3.3 Summation Notation 82
3.4 Measures of Central Tendency 85
3.5 Measures of Data Variation 95
3.6 Interpreting the Standard Deviation 100
3.7 Measures of Relative Standing 114
3.8 Methods for Detecting Outliers 121
3.9 Numerical Descriptive Measures for Populations 130

CASE STUDY 3.1 Are CEOs Really Worth Their Pay? 144
CASE STUDY 3.2 Bid Collusion in the Highway Contracting Industry 146

4 Probability: Basic Concepts 150

4.1 The Role of Probability in Statistics 151
4.2 Experiments, Events, and the Probability of an Event 151
4.3 Mutually Exclusive Events 156
4.4 Conditional Probability and Independence 170
4.5 The Additive and Multiplicative Laws of Probability (Optional) 178

CASE STUDY 4.1 Lottery Buster! 197
CASE STUDY 4.2 To Switch or Not to Switch? 200

5 Discrete Probability Distributions 202

5.1 Random Variables 203
5.2 Probability Models for Discrete Random Variables 204
5.3 The Expected Value and Variance of a Discrete Random Variable 208
5.4 The Binomial Probability Distribution 212
5.5 The Poisson Probability Distribution 223
5.6 The Hypergeometric Probability Distribution (Optional) 231
5.7 The Geometric Probability Distribution (Optional) 238

CASE STUDY 5.1 Commitment to the Firm: Stayers Versus Leavers 251
CASE STUDY 5.2 The Chevalier's Dilemma (Optional) 253

6 Continuous Probability Distributions 255

6.1 Probability Models for Continuous Random Variables 256
6.2 The Normal Probability Distribution 257
6.3 Descriptive Methods for Assessing Normality 273

6.4 The Normal Approximation to the Binomial Distribution 281
6.5 The Uniform Probability Distribution (Optional) 286
6.6 The Exponential Probability Distribution (Optional) 290

CASE STUDY 6.1 A Random Walk Down Wall Street 300
CASE STUDY 6.2 Break-Even Analysis—When to Market a New Product 305

7 SAMPLING AND SAMPLING DISTRIBUTIONS 307

7.1 Why the Method of Sampling Is Important 308
7.2 Sampling Distributions 311
7.3 The Sampling Distribution of $\bar{x}$; the Central Limit Theorem 319

CASE STUDY 7.1 TV Telephone Polls—Dial 900 to Register Your Opinion 337
CASE STUDY 7.2 A Decision Problem for Financial Managers: When to Investigate Cost Variances 338

8 ESTIMATION OF POPULATION PARAMETERS: CONFIDENCE INTERVALS 341

8.1 Introduction 342
8.2 Estimation of a Population Mean: Normal (z) Statistic 342
8.3 Estimation of a Population Mean: Student's t Statistic 354
8.4 Estimation of a Population Proportion 364
8.5 Estimation of the Difference Between Two Population Means: Independent Samples 369
8.6 Estimation of the Difference Between Two Population Means: Matched Pairs 382
8.7 Estimation of the Difference Between Two Population Proportions 390
8.8 Choosing the Sample Size 396
8.9 Estimation of a Population Variance (Optional) 403

CASE STUDY 8.1 An Aspirin a Day Keeps the Heart Doctor Away 418
CASE STUDY 8.2 Public Opinion Polls: How Accurate Are They? 420

9 INTRODUCTION TO SAMPLE SURVEY METHODS (OPTIONAL) 422

9.1 Why Sample Survey Methods Are Useful 423
9.2 Terminology 423
9.3 A Finite Population Correction Factor 425
9.4 Estimation: Simple Random Sampling 426
9.5 Choosing the Sample Size: Simple Random Sampling 430
9.6 Other Types of Samples: Stratified, Cluster, and Systematic Samples 432
9.7 Estimation: Stratified Random Sampling 435
