CONTENTS

Foreword xi
Introduction xiii

Part I A SHARED Methodology for Disaster Avoidance across Enterprise, B2B, and B2C Systems 1

Chapter 1 Avoidance Versus Recovery 3

What Is Disaster Recovery? 7
What Is Business Continuity? 12
What Is Disaster Avoidance? 13
How Daily Business Operations Benefit from Disaster Avoidance 17
Example 1: Web Site Co-location 18
Example 2: Intranet or Enterprise Workgroup Servers 19
Example 3: Home Office 22
Example 4: Mobile Wireless Access 23
Business Benefits 24
B2B and Business-to-Customer (B2C) Disaster Avoidance 24
Small Business Disaster Avoidance 25

Chapter 2 Business Continuity Requirements 27

The SHARED Objective of Analyzing Business and System Needs 28
The Process of Analyzing Business-User-Customer Needs 33
Step 1: Business Overview 34
Step 2: Data Flow Dependencies 39
Step 3: Technology Dependencies 44
Step 4: Prioritizing Existing Operational Problems 48
Step 5: Future Operational Requirements 48
Steps 6 and 7: Personnel and Facilities 49
Financial Considerations 55
B2B Requirements 59
Small Business Requirements 60

Chapter 3 Developing a Disaster Avoidance Strategy 61

Disaster Avoidance Alternatives for Critical Systems 62
Hardware Platforms 64

Co-location 64
Hot/Warm Standby or Failover 69
Hot or Cold Restoration 72
Applications 74
Data Store 75
System Access 77
Infrastructure 78
Access Devices 81
Shared Information (Intranet and E-business) 85
Small Businesses 86
Disaster Avoidance Best Practices 86
Performance Improvements Through SHARED Disaster Avoidance 88
Availability as a Function of Disaster Avoidance 92
Capacity/Scalability Enhancements 93
Maintenance and Deployment Enhancements 93

Chapter 4 Integrating Business Continuity and Disaster Avoidance Needs 95

Mating Business Requirements to Disaster Avoidance Alternatives 96
Step 1: Prioritize Order 98
Step 2: Map Requirements 100
Step 3: Define Exact Requirements 101
Step 4: End User and Facility Requirements 104
Step 5: B2B Requirements 107
Step 6: Financial Analysis 107
Example 2 - B2B Supply Chain Management 112
Analyzing Business-User-Customer Needs from Chapter 2 114
Mating Business Requirements to Disaster Avoidance Alternatives 118
Business Continuity and Disaster Avoidance—Added Cost Deployment and Validation Is Critical to Success 123 124

Part II Implementing the SHARED Architecture 127

Chapter 5 Access Devices 129

Best Practices 130
Asset and Configuration Management 131
Data Synchronization and Recovery 134

Products and Procedures 136
Handhelds 136
Palm Handhelds 136
Windows CE Handhelds 139
Research in Motion (RIM) Blackberry—Integrated Wireless Products 140
XcelleNet Afaria Products 141
Desktops and Laptops 141

Chapter 6 Platforms 143

Best Practices for Availability and Reliability 144
Platform Simplicity 144
Uninterrupted Power Supply (UPS) 146
Clustering 146
Co-location 148
Reduce Planned Downtime 152
Reduce Unplanned Downtime 153
Use Network Load Balancing (NLB) 153
Use Data Store Redundancy 153
Best Practices for Performance and Scalability 154
Best Practices for Management and Security 155
Products and Procedures 156
Microsoft Windows 157
Sun Solaris 161
IBM 162
Veritas 162

Chapter 7 Applications 165

Best Practices 166
For Disaster Avoidance 167
For Operations and Development 169
Products and Procedures 174

Chapter 8 Data Store 177

Critical Business Applications' Shared Data Store 181
Critical Remote Data Store Synchronization 182
Local Productivity Data Files 184
Data Sharing 185
File Replication 187
Best Practices 188

Databases 188
File Replication 190
Physical Data Storage 192
Products and Procedures 194
File Replication 194
Database Transaction Replication 196
SANs and Network Storage 198

Chapter 9 Infrastructure 203

Infrastructure Requirements 204
Best Practices 207
Avoid Chatty Communication 209
Network Load Balancing (NLB) 209
High-Speed Data Links 213
ISPs for User Access 215
CO or Wire Centers 216
Products and Services 216

Chapter 10 B2B, B2C, B2G, and Small Business Needs 219

Best Practices 222
Use Standards 225
Integrate the B2X Environment with Existing Back-End Systems 226
Isolate the B2B Environment from the Rest of the Systems for Security Purposes 227
Coordinate Disaster Avoidance and Recovery 228
Products and Procedures 229
Small Businesses 231

Chapter 11 Validation and Testing 235

Life Cycle 236
Test Objectives 237
Testing and Systems Management 239
Methodology 240
System Versus Component Tests 243
Validating the Components 243
Validating the System 243
Validating B2X E-commerce 244
Test Preparation 245
