BRIEF CONTENTS

CHAPTER 1 Introduction to Quantitative Analysis 21

CHAPTER 2 Probability Concepts and Applications 43

CHAPTER 3 Decision Analysis 89

CHAPTER 4 Regression Models 137

CHAPTER 5 Forecasting 177

CHAPTER 6 Inventory Control Models 219

CHAPTER 7 Linear Programming Models: Graphical and Computer Methods 275

CHAPTER 8 Linear Programming Modeling Applications with Computer Analyses in Excel and QM for Windows 331

CHAPTER 9 Linear Programming: The Simplex Method 371

CHAPTER 10 Transportation and Assignment Models 429

CHAPTER 11 Integer Programming, Goal Programming, and Nonlinear Programming 489

CHAPTER 12 Network Models 535

CHAPTER 13 Project Management 563

CHAPTER 14 Waiting Lines and Queuing Theory Models 605

CHAPTER 15 Simulation Modeling 645

CHAPTER 16 Markov Analysis 689

CHAPTER 17 Statistical Quality Control 719

CD-ROM MODULES

1 Analytic Hierarchy Process M1-1

2 Dynamic Programming M2-1

3 Decision Theory and the Normal Distribution M3-1

4 Game Theory M4-1

5 Mathematical Tools: Determinants and Matrices M5-1

6 Calculus-Based Optimization M6-1

CONTENTS

PREFACE 16

CHAPTER 1 Introduction to Quantitative Analysis 21

1.1 *Introduction 22*
1.2 *What Is Quantitative Analysis? 22*
1.3 *The Quantitative Analysis Approach 23*
Defining the Problem 23
Developing a Model 23
Acquiring Input Data 24
Developing a Solution 25
Testing the Solution 25
Analyzing the Results and Sensitivity Analysis 25
Implementing the Results 27
The Quantitative Analysis Approach and Modeling in the Real World 27
1.4 *How to Develop a Quantitative Analysis Model 27*
The Advantages of Mathematical Modeling 29
Mathematical Models Categorized by Risk 29
1.5 *The Role of Computers and Spreadsheet Models in the Quantitative Analysis Approach 29*
1.6 *Possible Problems in the Quantitative Analysis Approach 32*
Defining the Problem 32
Developing a Model 34
Acquiring Input Data 35
Developing a Solution 35
Testing the Solution 36
Analyzing the Results 36
1.7 *Implementation—Not Just the Final Step 37*
Lack of Commitment and Resistance to Change 37
Lack of Commitment by Quantitative Analysts 37
Summary 38 Glossary 38 Key Equations 38 Self-Test 38 Discussion Questions and Problems 39 Case Study: Food and Beverages at Southwestern University Football Games 40 Bibliography 41

CHAPTER 2 Probability Concepts and Applications 43

2.1 *Introduction 44*
2.2 *Fundamental Concepts 44*
Types of Probability 45
2.3 *Mutually Exclusive and Collectively Exhaustive Events 46*
Adding Mutually Exclusive Events 48
Law of Addition for Events That Are Not Mutually Exclusive 48
2.4 *Statistically Independent Events 49*
2.5 *Statistically Dependent Events 50*
2.6 *Revising Probabilities with Bayes' Theorem 52*
General Form of Bayes' Theorem 54
2.7 *Further Probability Revisions 54*
2.8 *Random Variables 56*
2.9 *Probability Distributions 57*
Probability Distribution of a Discrete Random Variable 57
Expected Value of a Discrete Probability Distribution 58
Variance of a Discrete Probability Distribution 59
Probability Distribution of a Continuous Random Variable 60
2.10 *The Binomial Distribution 61*
Solving Problems with the Binomial Formula 62
Solving Problems with Binomial Tables 62
2.11 *The Normal Distribution 64*
Area Under the Normal Curve 64
Using the Standard Normal Table 66
Haynes Construction Company Example 69
2.12 *The F Distribution 71*
2.13 *The Exponential Distribution 72*
2.14 *The Poisson Distribution 73*
Summary 74 Glossary 74 Key Equations 75 Solved Problems 75 Self-Test 79 Discussion Questions and Problems 80 Internet Homework Problems 84 Case Study: WTVX 85 Bibliography 85

Appendix 2.1 *Derivation of Bayes' Theorem 85*
Appendix 2.2 *Basic Statistics Using Excel 86*

CHAPTER 3 **Decision Analysis 89**
3.1 *Introduction 90*
3.2 *The Six Steps in Decision Making 90*
3.3 *Types of Decision-Making Environments 92*
3.4 *Decision Making Under Uncertainty 93*
Maximax 93
Maximin 94
Criterion of Realism (Hurwicz Criterion) 94
Equally Likely (Laplace) 96
Minimax Regret 96
3.5 *Decision Making Under Risk 97*
Expected Monetary Value 97
Expected Value of Perfect Information 98
Expected Opportunity Loss 99
Sensitivity Analysis 100
Using Excel QM to Solve Decision Theory Problems 101
3.6 *Decision Trees 103*
Sensitivity Analysis 108
3.7 *How Probability Values Are Estimated by Bayesian Analysis 109*
Calculating Revised Probabilities 109
Potential Problem in Using Survey Results 111
3.8 *Utility Theory 112*
Measuring Utility and Constructing a Utility Curve 112
Utility as a Decision-Making Criterion 115
Summary 118 *Glossary 118* *Key Equations 119* *Solved Problems 119* *Self-Test 124* *Discussion Questions and Problems 125* *Internet Homework Problems 131* *Case Study: Starting Right Corporation 131* *Case Study: Blake Electronics 132* *Internet Case Studies 134* *Bibliography 134*
Appendix 3.1 *Decision Models with QM for Windows 134*
Appendix 3.2 *Decision Trees with QM for Windows 135*
Appendix 3.3 *Using Excel for Bayes' Theorem 135*

CHAPTER 4 **Regression Models 137**
4.1 *Introduction 138*
4.2 *Scatter Diagrams 138*
4.3 *Simple Linear Regression 139*
4.4 *Measuring the Fit of the Regression Model 141*
Coefficient of Determination 143
Correlation Coefficient 143
4.5 *Using Computer Software for Regression 144*
4.6 *Assumptions of the Regression Model 146*
Estimating the Variance 147
4.7 *Testing the Model for Significance 148*
Triple A Construction Example 149
The Analysis of Variance (ANOVA) Table 150
Triple A Construction ANOVA Example 151
4.8 *Multiple Regression Analysis 151*
Evaluating the Multiple Regression Model 152
Jenny Wilson Realty Example 153
4.9 *Binary or Dummy Variables 154*
4.10 *Model Building 155*
4.11 *Nonlinear Regression 156*
4.12 *Cautions and Pitfalls in Regression Analysis 159*
Summary 160 *Glossary 160* *Key Equations 160* *Solved Problems 161* *Self-Test 163* *Discussion Questions and Problems 164* *Case Study: North–South Airline 168* *Bibliography 169*
Appendix 4.1 *Formulas for Regression Calculations 169*
Appendix 4.2 *Regression Models Using QM for Windows 170*
Appendix 4.3 *Accessing Regression Analysis in Excel 2007 172*

CHAPTER 5 **Forecasting 177**
5.1 *Introduction 178*
5.2 *Types of Forecasts 178*
Time-Series Models 178
Causal Models 179
Qualitative Models 179
5.3 *Scatter Diagrams and Time Series 180*
5.4 *Measures of Forecast Accuracy 182*
5.5 *Time-Series Forecasting Models 184*
Decomposition of a Time Series 184
Moving Averages 185
Exponential Smoothing 188
Trend Projections 192
Seasonal Variations 194
Seasonal Variations with Trend 197

The Decomposition Method of Forecasting with Trend and Seasonal Components 199
Using Regression with Trend and Seasonal Components 201
5.6 *Monitoring and Controlling Forecasts 204*
Adaptive Smoothing 205
5.7 *Using the Computer to Forecast 206*
Summary 206 Glossary 207 Key Equations 207 Solved Problems 208 Self-Test 210 Discussion Questions and Problems 211 Internet Homework Problems 214 Case Study: Forecasting Attendance at SWU Football Games 214 Internet Case Study 215 Bibliography 215
Appendix 5.1 Forecasting with QM for Windows 215

CHAPTER 6 Inventory Control Models 219
6.1 *Introduction 220*
6.2 *Importance of Inventory Control 221*
Decoupling Function 221
Storing Resources 221
Irregular Supply and Demand 221
Quantity Discounts 221
Avoiding Stockouts and Shortages 222
6.3 *Inventory Decisions 222*
6.4 *Economic Order Quantity: Determining How Much to Order 223*
Inventory Costs in the EOQ Situation 225
Finding the EOQ 226
Sumco Pump Company Example 227
Purchase Cost of Inventory Items 228
Sensitivity Analysis with the EOQ Model 229
6.5 *Reorder Point: Determining When to Order 230*
6.6 *EOQ Without the Instantaneous Receipt Assumption 231*
Annual Carrying Cost for Production Run Model 232
Annual Setup Cost or Annual Ordering Cost 232
Determining the Optimal Production Quantity 233
Brown Manufacturing Example 233
6.7 *Quantity Discount Models 236*
Brass Department Store Example 237
6.8 *Use of Safety Stock 240*
ROP with Known Stockout Costs 241
Safety Stock with Unknown Stockout Costs 244
6.9 *Single-Period Inventory Models 246*
Marginal Analysis with Discrete Distributions 247
Café du Donut Example 248
Marginal Analysis with the Normal Distribution 249
Newspaper Example 249
6.10 *ABC Analysis 251*
6.11 *Dependent Demand: The Case for Material Requirements Planning 252*
Material Structure Tree 252
Gross and Net Material Requirements Plan 253
Two or More End Products 255
6.12 *Just-in-Time Inventory Control 257*
6.13 *Enterprise Resource Planning 258*
Summary 259 Glossary 259 Key Equations 260 Solved Problems 261 Self-Test 263 Discussion Questions and Problems 264 Internet Homework Problems 270 Case Study: Martin–Pullin Bicycle Corporation 271 Internet Case Studies 271 Bibliography 271
Appendix 6.1 Inventory Control with QM for Windows 272

CHAPTER 7 Linear Programming Models: Graphical and Computer Methods 275
7.1 *Introduction 276*
7.2 *Requirements of a Linear Programming Problem 276*
Basic Assumptions of LP 277
7.3 *Formulating LP Problems 278*
Flair Furniture Company 278
7.4 *Graphical Solution to an LP Problem 280*
Graphical Representation of Constraints 280
Isoprofit Line Solution Method 285
Corner Point Solution Method 288
7.5 *Solving Flair Furniture's LP Problem Using QM for Windows and Excel 290*
Using QM for Windows 290
Using Excel's Solver Command to Solve LP Problems 291
7.6 *Solving Minimization Problems 296*
Holiday Meal Turkey Ranch 296
7.7 *Four Special Cases in LP 299*
No Feasible Solution 299
Unboundedness 301
Redundancy 302
Alternate Optimal Solutions 302

7.8 *Sensitivity Analysis 304*
High Note Sound Company 304
Changes in the Objective Function Coefficient 305
QM for Windows and Changes in Objective Function Coefficients 306
Excel Solver and Changes in Objective Function Coefficients 307
Changes in the Technological Coefficients 308
Changes in the Resources or Right-Hand-Side Values 309
QM for Windows and Changes in Right-Hand-Side Values 310
Excel Solver and Changes in Right-Hand-Side Values 310
Summary 312 Glossary 312 Solved Problems 313 Self-Test 317 Discussion Questions and Problems 318 Internet Homework Problems 326 Case Study: Mexicana Wire Works 326 Internet Case Study 327 Bibliography 327
Appendix 7.1 Installing the Solver Add-in in Excel 2007 328

CHAPTER 8 **Linear Programming Modeling Applications with Computer Analyses in Excel and QM for Windows 331**
8.1 *Introduction 332*
8.2 *Marketing Applications 332*
Media Selection 332
Marketing Research 334
8.3 *Manufacturing Applications 336*
Production Mix 336
Production Scheduling 337
8.4 *Employee Scheduling Applications 341*
Assignment Problems 341
Labor Planning 343
8.5 *Financial Applications 345*
Portfolio Selection 345
8.6 *Transportation Applications 346*
Shipping Problem 346
Truck Loading Problem 349
8.7 *Transshipment Applications 351*
Distribution Centers 351
8.8 *Ingredient Blending Applications 353*
Diet Problems 353
Ingredient Mix and Blending Problems 354
Summary 357 Self-Test 358 Problems 358 Internet Homework Problems 366 Case Study: Red Brand Canners 366 Case Study: Chase Manhattan Bank 368 Bibliography 369

CHAPTER 9 **Linear Programming: The Simplex Method 371**
9.1 *Introduction 372*
9.2 *How to Set Up the Initial Simplex Solution 372*
Converting the Constraints to Equations 373
Finding an Initial Solution Algebraically 373
The First Simplex Tableau 374
9.3 *Simplex Solution Procedures 378*
9.4 *The Second Simplex Tableau 379*
Interpreting the Second Tableau 382
9.5 *Developing the Third Tableau 383*
9.6 *Review of Procedures for Solving LP Maximization Problems 386*
9.7 *Surplus and Artificial Variables 386*
Surplus Variables 387
Artificial Variables 387
Surplus and Artificial Variables in the Objective Function 388
9.8 *Solving Minimization Problems 388*
The Muddy River Chemical Company Example 388
Graphical Analysis 389
Converting the Constraints and Objective Function 390
Rules of the Simplex Method for Minimization Problems 391
First Simplex Tableau for the Muddy River Chemical Corporation Problem 391
Developing a Second Tableau 393
Developing a Third Tableau 394
Fourth Tableau for the Muddy River Chemical Corporation Problem 396
9.9 *Review of Procedures for Solving LP Minimization Problems 397*
9.10 *Special Cases 398*
Infeasibility 398
Unbounded Solutions 398
Degeneracy 399
More Than One Optimal Solution 400
9.11 *Sensitivity Analysis with the Simplex Tableau 400*
High Note Sound Company Revisited 400
Changes in the Objective Function Coefficients 401
Changes in Resources or RHS Values 403
Sensitivity Analysis by Computer 405
9.12 *The Dual 406*
Dual Formulation Procedures 408
Solving the Dual of the High Note Sound Company Problem 408

9.13 *Karmarkar's Algorithm* 410
Summary 410 *Glossary* 410 *Key Equation* 411 *Solved Problems* 411 *Self-Test* 418 *Discussion Questions and Problems* 419 *Internet Homework Problems* 427 *Bibliography* 427

CHAPTER 10 **Transportation and Assignment Models 429**

10.1 *Introduction* 430
Transportation Model 430
Assignment Model 430
Special-Purpose Algorithms 430
10.2 *Setting Up a Transportation Problem* 431
10.3 *Developing an Initial Solution: Northwest Corner Rule* 432
10.4 *Stepping-Stone Method: Finding a Least-Cost Solution* 434
Testing the Solution for Possible Improvement 435
Obtaining an Improved Solution 438
10.5 *MODI Method* 443
How to Use the MODI Approach 443
Solving the Executive Furniture Corporation Problem with MODI 444
10.6 *Vogel's Approximation Method: Another Way to Find an Initial Solution* 446
10.7 *Unbalanced Transportation Problems* 449
Demand Less Than Supply 449
Demand Greater Than Supply 449
10.8 *Degeneracy in Transportation Problems* 451
Degeneracy in an Initial Solution 451
Degeneracy During Later Solution Stages 452
10.9 *More Than One Optimal Solution* 453
10.10 *Maximization Transportation Problems* 453
10.11 *Unacceptable or Prohibited Routes* 453
10.12 *Facility Location Analysis* 454
Locating a New Factory for Hardgrave Machine Company 454
10.13 *Assignment Model Approach* 457
The Hungarian Method (Flood's Technique) 458
Making the Final Assignment 462
10.14 *Unbalanced Assignment Problems* 464
10.15 *Maximization Assignment Problems* 464
Summary 466 *Glossary* 466 *Key Equations* 467 *Solved Problems* 467 *Self-Test* 474 *Discussion Questions and Problems* 474 *Internet Homework Problems* 483 *Case Study: Andrew-Carter, Inc.* 484 *Case Study: Old Oregon Wood Store* 485 *Internet Case Studies* 486 *Bibliography* 486
Appendix 10.1 *Using QM for Windows* 486
Appendix 10.2 *Comparison of Simplex Algorithm and Transportation Algorithm* 488

CHAPTER 11 **Integer Programming, Goal Programming, and Nonlinear Programming 489**

11.1 *Introduction* 490
11.2 *Integer Programming* 490
Harrison Electric Company Example of Integer Programming 491
Branch-and-Bound Method 492
Harrison Electric Company Revisited 493
Using Software to Solve the Harrison Integer Programming Problem 496
Mixed-Integer Programming Problem Example 498
11.3 *Modeling with 0–1 (Binary) Variables* 502
Capital Budgeting Example 502
Limiting the Number of Alternatives Selected 503
Dependent Selections 503
Fixed-Charge Problem Example 503
Financial Investment Example 505
11.4 *Goal Programming* 507
Example of Goal Programming: Harrison Electric Company Revisited 508
Extension to Equally Important Multiple Goals 509
Ranking Goals with Priority Levels 510
Solving Goal Programming Problems Graphically 511
Modified Simplex Method for Goal Programming 514
Goal Programming with Weighted Goals 516
11.5 *Nonlinear Programming* 518
Nonlinear Objective Function and Linear Constraints 518
Both Nonlinear Objective Function and Nonlinear Constraints 520
Linear Objective Function with Nonlinear Constraints 520

Computational Procedures for Nonlinear Programming 521

Summary 522 Glossary 522 Solved Problems 523 Self-Test 525 Discussion Questions and Problems 526 Internet Homework Problems 531 Case Study: Schank Marketing Research 531 Case Study: Oakton River Bridge 531 Case Study: Puyallup Mall 532 Bibliography 533

CHAPTER 12 **Network Models 535**

12.1 Introduction 536

12.2 Minimal-Spanning Tree Technique 536

12.3 Maximal-Flow Technique 539

12.4 Shortest-Route Technique 543

Summary 547 Glossary 547 Solved Problems 547 Self-Test 550 Discussion Questions and Problems 551 Internet Homework Problems 557 Case Study: Binder's Beverage 557 Case Study: Southwestern University Traffic Problems 558 Internet Case Study 559 Bibliography 559

Appendix 12.1 Network Models with QM for Windows 559

CHAPTER 13 **Project Management 563**

13.1 Introduction 564

13.2 PERT/CPM 564

General Foundry Example of PERT/CPM 565

Drawing the PERT/CPM Network 567

Activity Times 567

How to Find the Critical Path 569

Probability of Project Completion 574

What PERT Was Able to Provide 576

Sensitivity Analysis and Project Management 576

13.3 PERT/Cost 577

Planning and Scheduling Project Costs: Budgeting Process 578

Monitoring and Controlling Project Costs 581

13.4 Project Crashing 583

General Foundary Example 584

Project Crashing with Linear Programming 585

13.5 Other Topics in Project Management 588

Subprojects 589

Milestones 589

Resource Leveling 589

Software 589

Summary 589 Glossary 590 Key Equations 590 Solved Problems 591 Self-Test 593 Discussion Questions and Problems 594 Internet Homework Problems 599 Case Study: Southwestern University Stadium Construction 599 Case Study: Family Planning Research Center of Nigeria 600 Internet Case Studies 602 Bibliography 602

Appendix 13.1 Project Management with QM for Windows 602

CHAPTER 14 **Waiting Lines and Queuing Theory Models 605**

14.1 Introduction 606

14.2 Waiting Line Costs 606

Three Rivers Shipping Company Example 607

14.3 Characteristics of a Queuing System 608

Arrival Characteristics 608

Waiting Line Characteristics 610

Service Facility Characteristics 610

Identifying Models Using Kendall Notation 612

14.4 Single-Channel Queuing Model with Poisson Arrivals and Exponential Service Times (M/M/1) 614

Assumptions of the Model 614

Queuing Equations 615

Arnold's Muffler Shop Case 616

Enhancing the Queuing Environment 620

14.5 Multichannel Queuing Model with Poisson Arrivals and Exponential Service Times (M/M/m) 620

Equations for the Multichannel Queuing Model 621

Arnold's Muffler Shop Revisited 622

14.6 Constant Service Time Model (M/D/1) 624

Equations for the Constant Service Time Model 625

Garcia-Golding Recycling, Inc. 626

14.7 Finite Population Model (M/M/1 with Finite Source) 627

Equations for the Finite Population Model 627

Department of Commerce Example 628

14.8 Some General Operating Characteristic Relationships 630

14.9 More Complex Queuing Models and the Use of Simulation 630

Summary 631 Glossary 631 Key Equations 632 Solved Problems 633 Self-Test 636 Discussion Questions and

Problems 637 Internet Homework Problems 640 Case Study: New England Foundry 640 Case Study: Winter Park Hotel 642 Internet Case Study 642 Bibliography 642

Appendix 14.1 Using QM for Windows 643

CHAPTER 15 Simulation Modeling 645

15.1 Introduction 646

15.2 Advantages and Disadvantages of Simulation 646

15.3 Monte Carlo Simulation 648

Harry's Auto Tire Example 649

Using QM for Windows for Simulation 654

Simulation with Excel Spreadsheets 655

15.4 Simulation and Inventory Analysis 657

Simkin's Hardware Store 657

Analyzing Simkin's Inventory Costs 661

15.5 Simulation of a Queuing Problem 663

Port of New Orleans 663

Using Excel to Simulate the Port of New Orleans Queuing Problem 665

15.6 Fixed Time Increment and Next Event Increment Simulation Models 666

15.7 Simulation Model for a Maintenance Policy 666

Three Hills Power Company 667

Cost Analysis of the Simulation 671

Building an Excel Simulation Model for Three Hills Power Company 672

15.8 Two Other Types of Simulation Models 672

Operational Gaming 672

Systems Simulation 674

15.9 Verification and Validation 674

15.10 Role of Computers in Simulation 675

Summary 676 Glossary 676 Solved Problems 676 Self-Test 680 Discussion Questions and Problems 681 Internet Homework Problems 686 Case Study: Alabama Airlines 686 Case Study: Statewide Development Corporation 687 Internet Case Studies 688 Bibliography 688

CHAPTER 16 Markov Analysis 689

16.1 Introduction 690

16.2 States and State Probabilities 690

The Vector of State Probabilities for Three Grocery Stores Example 691

16.3 Matrix of Transition Probabilities 693

Transition Probabilities for the Three Grocery Stores 693

16.4 Predicting Future Market Shares 694

16.5 Markov Analysis of Machine Operations 695

16.6 Equilibrium Conditions 695

16.7 Absorbing States and the Fundamental Matrix: Accounts Receivable Application 699

Summary 704 Glossary 704 Key Equations 704 Solved Problems 705 Self-Test 709 Discussion Questions and Problems 709 Internet Homework Problems 713 Case Study: Rentall Trucks 713 Internet Case Studies 714 Bibliography 714

Appendix 16.1 Markov Analysis with QM for Windows 715

Appendix 16.2 Markov Analysis with Excel 716

CHAPTER 17 Statistical Quality Control 719

17.1 Introduction 720

17.2 Defining Quality and TQM 720

17.3 Statistical Process Control 721

Variability in the Process 721

17.4 Control Charts for Variables 723

The Central Limit Theorem 723

Setting $\bar{x}$ -Chart Limits 724

Setting Range Chart Limits 726

17.5 Conrol Charts for Attributes 728

p-Charts 728

c-Charts 731

Summary 732 Glossary 732 Key Equations 732 Solved Problems 733 Self-Test 735 Discussion Questions and Problems 735 Internet Homework Problems 737 Internet Case Study 737 Bibliography 738

Appendix 17.1 Using QM for Windows for SPC 738

APPENDICES 739

APPENDIX A Areas under the Standard Normal Curve 740

APPENDIX B Binomial Probabilities 742

APPENDIX C Values of $e^{-\lambda}$ for Use in the Poisson Distribution 747

APPENDIX D *F* Distribution Values 748

APPENDIX E Using POM-QM for Windows 750

APPENDIX F Using Excel QM 754

APPENDIX G Solutions to Selected Problems 755

APPENDIX H Solutions to Self-Tests 759

INDEX 763

CD-ROM MODULES

MODULE 1 **Analytic Hierarchy Process M1-1**

M1.1 *Introduction M1-2*

M1.2 *Multifactor Evaluation Process M1-2*

M1.3 *Analytic Hierarchy Process M1-4*

Judy Grim's Computer Decision M1-4

Using Pairwise Comparisons M1-5

Evaluations for Hardware M1-7

Determining the Consistency Ratio M1-7

Evaluations for the Other Factors M1-9

Determining Factor Weights M1-10

Overall Ranking M1-10

Using the Computer to Solve Analytic Hierarchy Process Problems M1-10

M1.4 *Comparison of Multifactor Evaluation and Analytic Hierarchy Processes M1-11*

Summary M1-12 Glossary M1-12 Key Equations M1-12 Solved Problems M1-12 Self-Test M1-14 Discussion Questions and Problems M1-14 Bibliography M1-16

Appendix M1.1 *Using Excel for the Analytic Hierarchy Process M1-16*

MODULE 2 **Dynamic Programming M2-1**

M2.1 *Introduction M2-2*

M2.2 *Shortest-Route Problem Solved by Dynamic Programming M2-2*

M2.3 *Dynamic Programming Terminology M2-6*

M2.4 *Dynamic Programming Notation M2-8*

M2.5 *Knapsack Problem M2-9*

Types of Knapsack Problems M2-9

Roller's Air Transport Service Problem M2-9

Summary M2-16 Glossary M2-16 Key Equations M2-16 Solved Problems M2-17 Self-Test M2-19 Discussion Questions and Problems M2-20 Case Study: United Trucking M2-22 Internet Case Study M2-22 Bibliography M2-23

MODULE 3 **Decision Theory and the Normal Distribution M3-1**

M3.1 *Introduction M3-2*

M3.2 *Break-Even Analysis and the Normal Distribution M3-2*

Barclay Brothers' New Product Decision M3-2

Probability Distribution of Demand M3-3

Using Expected Monetary Value to Make a Decision M3-5

M3.3 *Expected Value of Perfect Information and the Normal Distribution M3-6*

Opportunity Loss Function M3-6

Expected Opportunity Loss M3-6

Summary M3-8 Glossary M3-8 Key Equations M3-8 Solved Problems M3-9 Self-Test M3-10 Discussion Questions and Problems M3-10 Bibliography M3-12

Appendix M3.1 *Derivation of the Break-Even Point M3-12*

Appendix M3.2 *Unit Normal Loss Integral M3-13*

MODULE 4 **Game Theory M4-1**

M4.1 *Introduction M4-2*

M4.2 *Language of Games M4-2*

M4.3 *The Minimax Criterion* M4-3

Gross and Net Material Requirements Plan M4-3

M4.4 *Pure Strategy Games M4-4*

M4.5 *Mixed Strategy Games M4-5*

M4.6 *Dominance M4-7*

Summary M4-7 Glossary M4-8 Solved Problems M4-8 Self-Test M4-10 Discussion Questions and Problems M4-10 Bibliography M4-12

Appendix M4.1 *Game Theory with QM for Windows M4-12*

MODULE 5 **Mathematical Tools: Determinants and Matrices M5-1**

M5.1 *Introduction M5-2*

M5.2 *Matrices and Matrix Operations M5-2*

Matrix Addition and Subtraction M5-2

Matrix Multiplication M5-3

Matrix Notation for Systems of Equations M5-6

Matrix Transpose M5-6

M5.3 *Determinants, Cofactors, and Adjoints M5-7*

Determinants M5-7

Matrix of Cofactors and Adjoint M5-9

M5.4 *Finding the Inverse of a Matrix M5-10*

Summary M5-12 Glossary M5-12 Key Equations M5-12 Self-Test M5-13 Discussion Questions and Problems M5-13 Bibliography M5-14

Appendix M5.1 *Using Excel for Matrix Calculations M5-15*

MODULE 6 Calculus-Based Optimization M6-1

M6.1 *Introduction* M6-2

M6.2 *Slope of a Straight Line* M6-2

M6.3 *Slope of a Nonlinear Function* M6-3

M6.4 *Some Common Derivatives* M6-5
Second Derivatives M6-6

M6.5 *Maximum and Minimum* M6-6

M6.6 *Applications* M6-8
Economic Order Quantity M6-8
Total Revenue M6-9

Summary M6-10 *Glossary* M6-10 *Key Equations* M6-10 *Solved Problems* M6-11 *Self-Test* M6-11 *Discussion Questions and Problems* M6-12 *Bibliography* M6-12
