

Determination of urinary phenolic metabolites from rats treated with 1,2,3- and 1,3,5- trimethylbenzenes

Tsujimoto Y., Warashina M., Nam V.D., Noda T., Shimizu M., Yamaguchi Y., Moriwaki H., Morimoto T., Kakiuchi K., Maeda Y., Tanaka M.

Osaka City Institute of Public Health and Environmental Sciences; Vietnam National University, Hanoi, University of Science, Research Center for Environmental Technology and Sustainable Development; Graduate School of Materials Science, Nara Institute of Science and Technology; Department of Applied Materials Science, Osaka Prefecture University, Japan; Osaka City Institute of Public Health and Environmental Sciences, 8-34 Tojo-cho, Tennoji-ku, Osaka 543-0026, Japan

Abstract: [No abstract available]

Author Keywords: Phenolic metabolite; Ring oxidation; Trimethylbenzene

Index Keywords: 1,2,3 trimethylbenzene; 1,3,5 trimethylbenzene; phenol; animal experiment; article; controlled study; male; metabolism; nonhuman; rat; urinalysis; urinary excretion; Animals; Benzene Derivatives; Japan; Male; Oxidation-Reduction; Phenols; Rats; Rats, Wistar; Animalia

Year: 2005

Source title: Journal of Occupational Health

Volume: 47

Issue: 4

Page : 337-339

Cited by: 1

Link: Scopus Link

Chemicals/CAS: 1,2,3 trimethylbenzene, 526-73-8; 1,3,5 trimethylbenzene, 108-67-8; phenol, 108-95-2, 3229-70-7; Benzene Derivatives; Phenols
