CONTENTS

Foreword vii
Preface viii

1 **Introduction: the origins of information retrieval research** 1
The first information retrieval system tests; Testing indexing systems: Cranfield I; Testing indexing devices: Cranfield II; Relevance judgement and retrieval system tests; Research on relevance judgement; Relevance as a performance criterion; The Cranfield tradition and the information retrieval model

2 **Statistical and probabilistic retrieval** 27
Automatic indexing, classification and searching: SMART; Document clustering; Probabilistic models of relevance and relevance feedback; Achievements and limitations of the statistical approach

3 **Cognitive user modelling** 46
Information retrieval through man–machine dialogue: the THOMAS program; Anomalous States of Knowledge: ASK-based retrieval; Stereotype-based fiction retrieval: the GRUNDY program; Cognitive models for retrieval

4 **Expert intermediary systems** 71
Expert intermediary systems: CONIT, CANSEARCH and PLEXUS; Distributed expert-based intermediary system: MONSTRAT; Intelligent Intermediary for Information Retrieval: I^3R; COmposite Document Expert/Extended/Effective Retrieval: CODER; Expert systems for information retrieval

5 Associations, relations and hypertext 97
'As we may think': MEMEX; Database browsing and navigation: TINman; The origins of hypertext: Xanadu and NLS/Augment; Card-based hypertext systems: NoteCards and HyperCard; Transforming text to hypertext: Guide; Hypercatalog; Information retrieval by association; Potential and problems of hypertext
