Contents

Preface	ix
About the Cover Image	xiii
Acknowledgments	xv
About the Contributors	xvii

SECTION 1 GENERAL WISDOM

1.1	Situationist Game AI	3
	<i>Adam Russell</i>	
1.2	Artificial Personality: A Personal Approach to AI	17
	<i>Benjamin Ellinger, Microsoft</i>	
1.3	Creating Designer Tunable AI	27
	<i>Borut Pfeifer, Electronic Arts</i>	
1.4	AI as a Gameplay Analysis Tool	39
	<i>Neil Kirby, Bell Laboratories</i>	
1.5	Ecological Balance in AI Design	49
	<i>Adam Russell</i>	

SECTION 2 MOVEMENT AND PATHFINDING

2.1	Company of Heroes Squad Formations Explained	61
	<i>Chris Jurney, Kaos Studios</i>	
2.2	Turning Spaces into Places	71
	<i>Adam Russell</i>	
2.3	Dynamically Updating a Navigation Mesh via Efficient Polygon Subdivision	83
	<i>Paul Marden, DigiPen Institute of Technology</i> <i>Forrest Smith, Gas Powered Games</i>	
2.4	Intrinsic Detail in Navigation Mesh Generation	95
	<i>Colt "MainRoach" McAnlis, Ensemble Studios</i> <i>James Stewart, Stormfront Studios</i>	

2.5	Navigation Mesh Generation: An Empirical Approach	113
	<i>David Hamm, Red Storm Entertainment</i>	
2.6	Navigation Graph Generation in Highly Dynamic Worlds	125
	<i>Ramon Axelrod, Alseek</i>	
2.7	Fast Pathfinding Based on Triangulation Abstractions	143
	<i>Doug Demyen, BioWare Corp.</i> <i>Michael Buro, University of Alberta</i>	
2.8	Automatic Path Node Generation for Arbitrary 3D Environments . . .	159
	<i>John W. Ratcliff, Simutronics Corporation</i>	
2.9	Risk-Adverse Pathfinding Using Influence Maps	173
	<i>Ferns Paanakker, Wishbone Games B.V.</i>	
2.10	Practical Pathfinding in Dynamic Environments	179
	<i>Per-Magnus Olsson, Linköping University</i>	
2.11	Postprocessing for High-Quality Turns	191
	<i>Chris Jurney, Kaos Studios</i>	
2.12	Memory-Efficient Pathfinding Abstractions	203
	<i>Nathan Sturtevant, University of Alberta</i>	
SECTION 3 ARCHITECTURE		219
3.1	A Flexible AI Architecture for Production and Prototyping of Games	221
	<i>Terry Wellmann, High Voltage Software, Inc.</i>	
3.2	Embracing Declarative AI with a Goal-Based Approach	229
	<i>Kevin Dill, Blue Fang Games</i>	
3.3	The MARPO Methodology: Planning and Orders	239
	<i>Brett Laming, Rockstar Leeds</i>	
3.4	Getting Started with Decision Making and Control Systems	257
	<i>Alex J. Champandard, AiGameDev.com</i>	
3.5	Knowledge-Based Behavior System—A Decision Tree/Finite State Machine Hybrid	265
	<i>Nachi Lau, LucasArts</i>	
3.6	The Emotion Component: Giving Characters Emotions	275
	<i>Ferns Paanakker, Wishbone Games B.V.</i> <i>Erik van der Pluijm</i>	

3.7	Generic Perception System	285
	<i>Frank Puig Placeres</i>	
3.8	Peer-To-Peer Distributed Agent Processing	295
	<i>Borut Pfeifer, Electronic Arts</i>	
3.9	AI Architectures for Multiprocessor Machines	305
	<i>Jessica D. Bayliss, Ph.D., Rochester Institute of Technology, Information Technology Department</i>	
3.10	Level Up for Finite State Machines: An Interpreter for Statecharts .	317
	<i>Philipp Kolhoff, KING Art</i>	
	<i>Jörn Loviscach, Hochschule Bremen</i>	
3.11	Building a Behavior Editor for Abstract State Machines	333
	<i>Igor Borovikov, FrameFree Technologies, Inc.</i>	
	<i>Aleksey Kadukin, Electronic Arts</i>	
3.12	Multi-Axial Dynamic Threshold Fuzzy Decision Algorithm	347
	<i>Dave Mark, Intrinsic Algorithm LLC</i>	

SECTION 4 TACTICS AND PLANNING

4.1	RTS Terrain Analysis: An Image-Processing Approach	361
	<i>Julio Obelleiro, Enigma Software Productions</i>	
	<i>Raúl Sampedro, Enigma Software Productions</i>	
	<i>David Hernández Cerpa, Enigma Software Productions</i>	
4.2	An Advanced Motivation-Driven Planning Architecture	373
	<i>David Hernández Cerpa, Enigma Software Productions</i>	
	<i>Julio Obelleiro, Enigma Software Productions</i>	
4.3	Command Hierarchies Using Goal-Oriented Action Planning	383
	<i>David Pittman, Stormfront Studios, Inc.</i>	
4.4	Practical Logic-Based Planning	393
	<i>Daniel Wilhelm, California Institute of Technology</i>	
4.5	Simulation-Based Planning in RTS Games	405
	<i>Frantisek Sailer, University of Alberta</i>	
	<i>Marc Lanctot, University of Alberta</i>	
	<i>Michael Buro, University of Alberta</i>	
4.6	Particle Filters and Simulacra for More Realistic Opponent Tracking	419
	<i>Christian J. Darken, The MOVES Institute</i>	
	<i>Bradley G. Anderegg, Alion Science and Technology Corporation</i>	

4.7	Using Bayesian Networks to Reason About Uncertainty	429
	<i>Devin Hyde</i>	
4.8	The Engagement Decision	443
	<i>Baylor Wetzel, Brown College</i>	

SECTION 5 GENRE SPECIFIC

5.1	A Goal Stack-Based Architecture for RTS AI	457
	<i>David Hernández Cerpa, Enigma Software Productions</i>	
5.2	A Versatile Constraint-Based Camera System	467
	<i>Julien Hamaide, 10Tacle Studios Belgium/Elsewhere Entertainment</i>	
5.3	Seeing in 1D: Projecting the World onto a Line	479
	<i>Andrew Slawinski</i>	
5.4	Reaction Time with Fitts' Law	485
	<i>Baylor Wetzel, Brown College</i>	
5.5	Enabling Actions of Opportunity with a Light-Weight Subsumption Architecture	493
	<i>Habib Loew, ArenaNet</i>	
	<i>Chad Hinkle, Nintendo of America Inc.</i>	
5.6	Toward More Humanlike NPCs for First-/Third-Person Shooter Games	499
	<i>Darren Doherty, National University of Ireland Galway</i>	
	<i>Colm O'Riordan, National University of Ireland Galway</i>	
5.7	Stop Getting Side-Trackd by Side-Quests	513
	<i>Curtis Onuczko, University of Alberta</i>	
	<i>Duane Szafran, University of Alberta</i>	
	<i>Jonathan Schaeffer, University of Alberta</i>	

SECTION 6 SCRIPTING AND DIALOGUE

6.1	Spoken Dialogue Systems	531
	<i>Hugo Pinto, University of Sheffield</i>	
	<i>Roberta Carizosa, University of Sheffield</i>	
6.2	Implementing Story-Driven Games with the Aid of Dynamical Policy Models	551
	<i>Fabio Zambetta, School of Computer Science & IT, RMIT University</i>	

6.3	Individualized NPC Attitudes with Social Networks	571
	<i>Christian J. Darken, The MOVES Institute</i>	
	<i>John D. Kelly, U.S. Navy</i>	
6.4	Scripting Your Way to Advanced AI	579
	<i>Alistair Doulin, Auran Games</i>	
6.5	Dialogue Managers	593
	<i>Hugo Pinto, University of Sheffield</i>	
SECTION 7 LEARNING AND ADAPTATION		605
7.1	Learning Winning Policies in Team-Based First-Person Shooter Games	607
	<i>Stephen Lee-Urban, Lehigh University</i>	
	<i>Megan Smith, Lehigh University</i>	
	<i>Héctor Muñoz-Avila, Lehigh University</i>	
7.2	Adaptive Computer Games: Easing the Authorial Burden	617
	<i>Manish Mehta, Georgia Institute of Technology</i>	
	<i>Santi Ontañón, Georgia Institute of Technology</i>	
	<i>Ashwin Ram, Georgia Institute of Technology</i>	
7.3	Player Modeling for Interactive Storytelling: A Practical Approach ..	633
	<i>David Thue, University of Alberta</i>	
	<i>Vadim Bulitko, University of Alberta</i>	
	<i>Marcia Spetch, University of Alberta</i>	
7.4	Automatically Generating Score Functions for Strategy Games	647
	<i>Sander Bakkes, Universiteit Maastricht</i>	
	<i>Pieter Spronck, Universiteit Maastricht</i>	
7.5	Automatic Generation of Strategies	659
	<i>Pieter Spronck, Maastricht University, The Netherlands</i>	
	<i>Marc Ponien, Maastricht University, The Netherlands</i>	
7.6	A Practical Guide to Reinforcement Learning in First-Person Shooters	671
	<i>Michelle McPartland, University of Queensland</i>	
	About the CD-ROM	685
	Index	687
