A BALKEMA BOOK

Contents

FOREWORD	VII
1 INTRODUCTION	1
1.1 General background	1
1.1.1 The scope of the science	1
1.1.2 The application of hydrogeology	2
1.1.3 Historical background of the science	5
1.1.4 History of groundwater use	8
1.2 Hydrological systems	10
1.2.1 Earth and water	10
1.2.2 Water at land surface	15
1.2.3 Surface water systems	21
1.2.4 The unsaturated zone	24
1.2.5 Groundwater systems	29
2 ROCKS AND GROUNDWATER	39
2.1 Basic concepts	39
2.1.1 Physical properties of water and rock	39
2.1.2 Groundwater system terminology	46
2.2 Formation of groundwater systems	52
2.2.1 Groundwater systems in metamorphic and intrusive rock	52
2.2.2 Development of aquifers in volcanic rock	56
2.2.3 Aquifer formation in consolidated sediments	59
2.2.4 Unconsolidated sediments and groundwater systems	66
2.3 Groundwater exploration methods	70
2.3.1 Methods at land surface	70
2.3.2 Subsurface investigation methods	76
3 GROUNDWATER MOVEMENT	79
3.1 Principles of groundwater flow	79
3.1.1 Groundwater flow in unconsolidated rock	79
3.1.2 Groundwater flow in consolidated rock	93
3.2 Flow in groundwater systems	97
3.2.1 Basic concepts	97
3.2.2 Regional groundwater flow	101

3.2.3	Local groundwater flow	122
3.2.4	Pumping test methodology	127
3.3	The flow systems concept	129
3.3.1	Formation of flow systems	129
3.3.2	Flow computations	132
4	WATER BALANCES	135
4.1	Groundwater balance concepts	135
4.1.1	The general idea	135
4.1.2	Practical application of groundwater balances	140
4.2	Groundwater balance estimation methods	142
4.2.1	Basic concepts and recharge	142
4.2.2	Discharge and storage	150
4.2.3	Groundwater balances using flow computations and modelling	153
4.3	Groundwater balances and their environment	155
4.3.1	Groundwater recharge and climate	155
4.3.2	Groundwater balances and geology	160
5	GROUNDWATER CHEMISTRY	169
5.1	Groundwater and chemical processes	169
5.1.1	Chemical properties of water and rock	169
5.1.2	Development of groundwater chemistry	180
5.1.3	Assessment of groundwater chemistry	187
5.2	Groundwater chemistry and rock types	192
5.2.1	Groundwater chemistry in consolidated rocks	192
5.2.2	Groundwater chemistry in unconsolidated rocks	195
6	DEVELOPMENT OF GROUNDWATER	199
6.1	Groundwater management	199
6.1.1	Water management	199
6.1.2	The role of groundwater	202
6.2	Groundwater planning and investigations	204
6.2.1	Water planning	204
6.2.2	Selection of investigation methods	206
6.2.3	Groundwater monitoring	209
6.3	Groundwater resources studies	211
6.3.1	Regional groundwater availability	211
6.3.2	Groundwater demand	220
6.3.3	Local groundwater development	223
