

FUNDAMENTALS OF

BioMEMS and Medical Microdevices

Steven S. Saliterman

SPIE
PRESS

Bellingham, Washington USA

Contents

Symbols and Units	xi
Acronyms	xvii
Preface	xxv
1 Introduction to BioMEMS	1
1.1 What are BioMEMS?	1
1.2 The Driving Force Behind Biomedical Applications	4
1.3 Biocompatibility	7
1.4 Reliability Considerations	7
1.5 Regulatory Considerations	8
1.6 Other Organizations	12
1.7 Education	13
1.8 Review Questions	14
References	14
2 Silicon Microfabrication	19
2.1 Hard Fabrication Considerations	20
2.2 Lithography	26
2.3 Etching Methods	38
2.4 Thin-Film Deposition Processes	45
2.5 Ion Implantation	53
2.6 Wet-Bulk Surface Micromachining	54
2.7 Dry-Bulk Surface Micromachining	63
2.8 HEXIL Process	65
2.9 Electroplating	65
2.10 Substrate Bonding	68
2.11 Review Questions	69
References	70
3 “Soft” Fabrication Techniques	75
3.1 Introduction	75
3.2 Biomaterials	76
3.3 Soft Lithography	78
3.4 Micromolding	79
3.5 Three-Dimensional Photopolymerization	86
3.6 Smart Polymers and Hydrogels	89

3.7	Nanomedicine	94
3.8	Thick-Film Technologies	97
3.9	Review Questions	98
	References	98
4	Polymer Materials	107
4.1	Polymers	107
4.2	Physical Properties	111
4.3	Copolymers	116
4.4	Review Questions	118
	References	118
5	Microfluidic Principles	119
5.1	Introduction	120
5.2	Transport Processes	126
5.3	Electrokinetic Phenomena	137
5.4	Microvalves	148
5.5	Micromixers	152
5.6	Micropumps	153
5.7	Review Questions	158
	References	160
6	Sensor Principles and Microsensors	167
6.1	Introduction	168
6.2	Fabrication	172
6.3	Basic Sensors	173
6.4	Optical Fibers	187
6.5	Piezoelectricity and SAW Devices	192
6.6	Electrochemical Detection	197
6.7	Applications in Medicine	204
6.8	Review Questions	213
	References	214
7	Microactuators and Drug Delivery	219
7.1	Introduction	219
7.2	Activation Methods	220
7.3	Microactuators for Microfluidics	230
7.4	Equivalent Circuit Representation	232
7.5	Drug Delivery	234
7.6	Review Questions	243
	References	243
8	Clinical Laboratory Medicine	249
8.1	Introduction	250
8.2	Chemistry	255
8.3	Hematology	261

8.4	Immunology	266
8.5	Microbiology	269
8.6	Urinalysis	270
8.7	Coagulation Assays	271
8.8	Arterial Blood Gases	272
8.9	Review Questions	274
	References	275
9	Micro-Total-Analysis Systems (μTAS)	283
9.1	Lab-on-a-Chip	284
9.2	Capillary Electrophoresis Arrays (CEA)	287
9.3	Cell, Molecule, and Particle Handling	290
9.4	Surface Modification	295
9.5	Microspheres	306
9.6	Cell-Based Bioassay Systems	309
9.7	Review Questions	309
	References	310
10	Detection and Measurement Methods	315
10.1	Introduction	315
10.2	Detection Schemes	316
10.3	Measurement Systems	322
10.4	Review Questions	329
	References	329
11	Genomics and DNA Microarrays	341
11.1	Introduction to Genomics	341
11.2	Polymerase Chain Reaction (PCR)	351
11.3	Gene Expression Profiling	353
11.4	DNA-LOC Devices	355
11.5	DNA Microarrays	356
11.6	Pharmacogenomics	373
11.7	Review Questions	374
	References	374
12	Proteomics and Protein Microarrays	377
12.1	Introduction to Proteomics	377
12.2	Mass Spectrometry (MS)	382
12.3	Protein LOC Devices	392
12.4	Protein Microarrays	393
12.5	Bioinformatics	406
12.6	Review Questions	407
	References	408
13	Emerging BioMEMs Technology	413
13.1	Introduction	414
13.2	Minimally Invasive Surgery	414

13.3	Point-of-Care Clinical Diagnosis	415
13.4	Cardiovascular	418
13.5	Diabetes	422
13.6	Endoscopy	424
13.7	Neurosciences	425
13.8	Oncology	431
13.9	Ophthalmology	432
13.10	Dermabrasion	435
13.11	Tissue Engineering	436
13.12	Cell-Based Biosensors	437
13.13	Homeland Security	438
13.14	Review Questions	441
	References	442
14	Packaging, Power, Data, and RF Safety	449
14.1	Packaging	449
14.2	Electronic Assembly and Packaging	458
14.3	Power Systems	463
14.4	Data transmission	470
14.5	Radio Frequency (RF) Safety	472
14.6	Review Questions	477
	References	478
15	Biocompatibility, FDA, and ISO 10993	483
15.1	Introduction	484
15.2	FDA Guidance	485
15.3	International Organization for Standardization	485
15.4	Cytotoxicity	493
15.5	Sensitization	495
15.6	Irritation	498
15.7	Systemic Toxicity	499
15.8	Genotoxicity, Carcinogenicity and Reproduction	500
15.9	Implantation	501
15.10	Hemocompatibility	504
15.11	Degradation	506
15.12	Biocompatibility of Polymers	508
15.13	Biofouling	511
15.14	Biocompatibility of Other Materials	512
15.15	Review Questions	516
	References	517
	Appendix A: Common BioMEMS Polymers	527
	Appendix B: Medical Imaging	545
	Appendix C: FDA Blue Book Memorandum #G95-1	557
	Glossary	561
	Index	595
