INTRODUCTION TO LOGIC

Charles W. Kegley
Jacquelyn Ann Kegley

California State University
Bakersfield, California

UNIVERSITY
PRESS OF
AMERICA

LANHAM • NEW YORK • LONDON

Contents

Part I: Language	1
Chapter 1 Introduction	3
1.1 Why Logic? 3	
1.2 What is Logic? 5	
1.3 Statements, Propositions, and Sentences, 6	
1.4 Arguments, 9	
1.5 Logical Analysis, 11	
1.6 Analyzing Arguments, 17	
1.7 Deduction and Induction, 27	
1.8 Logic and the Question of Truth, 33	
1.9 Validity and Deductive Arguments, 35	
1.10 Good Versus Bad Inductive Arguments, 45	
Chapter Outline, 49	
Chapter 2 Dimensions of Language	51
2.1 Introduction, 51	
2.2 Uses of Language, 52	
2.3 Logical Versus Non-Logical Material, 63	
2.4 Kinds of Disagreement, 67	
Chapter Outline, 77	

Chapter 3 Meaning and Definition	79
3.1 Signs and Symbols, 79	
3.2 Denotation and Connotation, 83	
3.3 Ambiguity—Vagueness, 86	
3.4 Kinds of Definition and Their Uses, 91	
3.5 Connotative and Denotative Definitions, 98	
3.6 Rules for Forming and Criticizing Definitions, 101	
3.7 Classification and Division, 108	
Chapter Outline, 110	
 Chapter 4 The Informal Fallacies	 113
4.1 What is a Fallacy? 113	
4.2 The Fallacies of Inconsistency and Begging the Question, 116	
4.3 Fallacies of Irrelevance, 123	
4.4 Fallacies of Neglected Aspect, 138	
4.5 Fallacies of Ambiguity or Misuses of Language, 146	
Chapter Outline, 155	
 Part II: Deduction	 159
 Chapter 5 Categorical Propositions	 161
5.1 Quantity and Quality, 161	
5.2 Quality and Quantity and Distribution, 165	
5.3 Translating Statements into Standard Form, 167	
5.4 Venn Diagram Representation of Categorical Statements, 172	
5.5 The Square of Opposition and Existential Import, 177	
5.6 Immediate Inferences: Conversion, Obversion, and Contraposition, 184	
Chapter Outline, 188	
 Chapter 6 The Syllogism	 191
6.1 The Categorical Syllogism, 191	
6.2 Ways of Determining Validity: Rules and Diagrams, 194	
6.3 Testing for Validity by Logical Analogy, 208	
6.4 The Enthymeme, 210	
6.5 Further Help, 214	
Chapter Outline, 217	

Chapter 7 Truth-Functional Statements

219

- 7.1 Simple and Compound Statements, 219
- 7.2 Truth-Functors and Truth-Value, 221
- 7.3 Symbolization: Statement Forms and Argument Forms, 223
- 7.4 The Truth-Table, 225
- 7.5 Negation, 226
- 7.6 Conjunction, 228
- 7.7 Disjunction, 231
- 7.8 Conditional Statements and Material Implication, 236
- 7.9 Biconditionals, 245
- 7.10 Logical Punctuation and Constructing Truth Tables, 247
- 7.11 Testing Arguments, 251
- 7.12 Tautologies, Contradictions, and Contingencies, 257
- 7.13 Tautology, Validity and Logical Implication, 259
- 7.14 Consistency and Validity, 261
- 7.15 Logical Equivalence, Tautology, and Some Laws of Logic, 262
- 7.16 The Three Laws of Thought, 265
- Chapter Outline, 267

Chapter 8 The Method of Deduction

271

- 8.1 Inference Rules, 271
- 8.2 Rules of Replacement, 279
- 8.3 Conditional Proof, 288
- 8.4 The Reductio ad Absurdum, 291
- 8.5 Proof of Invalidity, 292
- 8.6 Inconsistency, 294
- Chapter Outline, 295

Chapter 9 Quantification Theory

299

- 9.1 Singular Statements, 299
- 9.2 Quantifiers, 300
- 9.3 The Traditional Categorical Statements, 303
- 9.4 Relations Between the Quantifiers, 307
- 9.5 Complex Symbolization, 309
- 9.6 Proving Validity, 311
- 9.7 Proving Invalidity, 318
- 9.8 Asyllogistic Arguments, 321
- 9.9 Relational Predicates and Multiple Quantifier, 324

9.10 Proofs Involving Relations, 327	
9.11 Quantifier Negation, 329	
Chapter Outline, 331	

Part III: Induction

333

Chapter 10 Inductive Generalization and Analogy	335
---	-----

10.1 Inductive and Deductive Similarities, 335	
10.2 Enumerative Generalization, 336	
10.3 Analogical Generalization, 350	
10.4 Analogy, Metaphor and Model, 357	
Chapter Outline, 363	

Chapter 11 Necessary and Sufficient Conditions, Causal Relations, and Mill's Methods	367
--	-----

11.1 Science and Scientific Explanation, 367	
11.2 Explanation: Four Kinds, 368	
11.3 Law, 374	
11.4 Theory, 376	
11.5 Necessary and Sufficient Conditions, 380	
11.6 Critique of "Necessary and Sufficient Conditions", 383	
11.7 Mill's Methods of Induction, 384	
11.8 Evaluation of Mill's Methods, 390	
Chapter Outline, 393	

Chapter 12 The Hypo-Deductive Method of Reasoning	395
---	-----

12.1 Hypothesis Formulation and Testing, 395	
12.2 Elaborating and Confirming Hypotheses, 406	
12.3 The Problems of Confirmation, 419	
Chapter Outline, 426	

Chapter 13 Decision Making	429
----------------------------	-----

13.1 The Importance of Analyzing Decision Making, 429	
13.2 Steps in Decision Making and Problem Solving, 431	
13.3 Imaginatively Project Self into the Situation, 435	
13.4 Testing and Eliminating Hypotheses and Proposals, 437	
13.5 Decision, and Testing the Decision, 437	
Chapter Outline, 439
