1 WORLD VIEW

Introduction	3
International development goals	10
1.1 Size of the economy	12
1.2 Development progress	16
1.3 Gender differences	20
1.4 Trends in long-term economic development	24
1.5 Long-term structural change	28
1.6 Key indicators for other economies	32

Box

1a Measuring the impact of the crisis on Indonesia's poor	
---	--

Figures

1a Gini coefficients in transition economies	7
1.1 Where money goes farther	15
1.4 Botswana and Mauritius are growing as fast as East Asian economies	27
1.5 Agriculture loses ground	31

Text tables

1a Real GDP growth, 1991–2001	4
1b Progress in social indicators	5
1c Estimated poverty in transition economies, 1987–88 and 1993–95	7
1d Performance gaps and distance to goals	8
1e Regional average growth rates in real consumption needed to halve poverty in 25 years	9

NEW FEATURES

World View includes a new table that contrasts the status of men and women, and of boys and girls, using key social indicators. In table 1.1 surface area—a country's total land area including areas under inland bodies of water—has replaced land area as the measure of size. Table 1.3 shows indicators that measure progress toward the international development goals, and the introduction looks at how

2 PEOPLE

Introduction	35
Patterns of educational attainment	40
2.1 Population	42
2.2 Population dynamics	46
2.3 Labor force structure	50
2.4 Employment by economic activity	54
2.5 Unemployment	58
2.6 Wages and productivity	62
2.7 Poverty	66
2.8 Distribution of income or consumption	70
2.9 Education inputs	74
2.10 Participation in education	78
2.11 Education outcomes	82
2.12 Gender and education	86
2.13 Health expenditure, services, and use	90
2.14 Access to health services	94
2.15 Reproductive health	98
2.16 Health: risk factors and future challenges	102
2.17 Confronting AIDS	106
2.18 Mortality	110

Boxes

2a Strategies to improve girls' education	38
2b How countries stack up in student achievement	39
2.18 Life tables: an essential tool for mortality analysis	113

Figures

2a High fertility is driving rapid growth in the school-age population in some regions	36
2b High enrollments are no guarantee of high achievement	37
2c Some developing countries have far to go to reach universal primary enrollment	37
2d Female enrollments do not respond to income growth	38
2.1 The aging population	45
2.2 International migration adds to population growth in industrial countries...but not in developing countries	49
2.3 Does rapid increase in the labor force depress growth and living standards?	53
2.9 Private spending on education is sizable in some low- and middle-income countries	77
2.12 Girls' enrollments continue to lag	89

Text tables

2.4a Nonagricultural labor force working in gender-dominated occupations	57
2.5a Countries by type of social security program, selected years	61
2.13a Public health spending in low-income countries, 1990-97	93

3 ENVIRONMENT

Introduction	
Water	115
3.1 Land use and deforestation	118
3.2 Agricultural inputs	120
3.3 Agricultural output and productivity	124
3.4 Biodiversity and protected areas	128
3.5 Freshwater	132
3.6 Water pollution	136
3.7 Energy production and use	140
3.8 Energy efficiency and emissions	144
3.9 Sources of electricity	148
3.10 Urbanization	152
3.11 Urban environment	156
3.12 Traffic and congestion	160
3.13 Air pollution	164
3.14 Government commitment	168
3.15 Toward a measure of genuine savings	170

Boxes

3a The environmental challenges of urbanization	116
3b Measuring the environment	116

Figures

3.1 The countries with the highest deforestation rates in 1990-95	123
3.2 The world is growing more cereal	127
3.3a Cereal yield has grown fastest in high-income countries . . .	131
3.3b . . . but food production overall has grown most in middle-income countries	131
3.4 High-income economies have the largest share of protected land area	135
3.6 China and India accounted for a large share of the emissions of organic water pollutants in 1994...and have not seen the decline in these emissions seen elsewhere	143
3.7 Four countries accounted for almost 40 percent of commercial energy use in 1996	147
3.8a Historical trends show accelerating growth in global CO ₂ emissions . . .	151
3.8b . . . and a rising average temperature at the earth's surface	151
3.9 Coal still dominates in global electricity generation	155
3.10 The world's urban population continues to boom	159
3.11 Household sewerage connections remain scarce in many cities	163
3.12 Bicycles outpace cars in world production	167
3.14 Climate change and biodiversity at the fore	171

Text table

3.14a Status of national environmental action plans	170
---	-----

NEW FEATURES

● *People* includes a new table on wages and productivity and expands coverage of health with a new table on the HIV/AIDS epidemic. The introduction discusses the state of education in developing countries and the policies and strategies needed to achieve the goals set by the World

NEW FEATURES

● *Environment* contains two new tables. Table 3.11 covers urban living conditions in selected cities around the world, and table 3.15 presents a new indicator—genuine savings—along with the data used to construct it. The introduction discusses why developing new measures of environmental sustainability is important—and why it is difficult.

4 ECONOMY

Introduction	179
Performance and prospects, 1997–2001	182
4.1 Growth of output	188
4.2 Structure of output	192
4.3 Structure of manufacturing	196
4.4 Growth of merchandise trade	200
4.5 Structure of merchandise exports	204
4.6 Structure of merchandise imports	208
4.7 Structure of service exports	212
4.8 Structure of service imports	216
4.9 Structure of demand	220
4.10 Growth of consumption and investment	224
4.11 Structure of consumption in PPP terms	228
4.12 Relative prices in PPP terms	231
4.13 Central government finances	234
4.14 Central government expenditures	238
4.15 Central government revenues	242
4.16 Monetary indicators and prices	246
4.17 Balance of payments current account	250
4.18 External debt	254
4.19 External debt management	258

Figures

4.3 Dominant countries drive regional trends in manufacturing growth	199
4.5 A strong trend toward manufactures among the top developing country exporters	207
4.6 The structure of imports looks much the same across regions	211
4.7 Developing countries are garnering a growing share of service exports	215
4.8 A shifting dominance in service imports	219
4.10 Regional trends in gross domestic investment	227
4.12 Health care services are relatively expensive in high-income economies . . . but capital investment is far more expensive in low- and middle-income economies	233
4.13 Worsening fiscal balances in most of East Asia	237
4.15 Social security taxes account for a large share of current revenue in high-income countries . . . and a large share in many middle-income countries	245
4.17 Current account deficits as a corollary to growth	253
4.18 World Bank and IMF lending expands in the regions most at risk of financial crisis	257
4.19 A growing reliance on short-term financing in East Asia	261

Text tables

4a Recent economic performance	184
4b Key macroeconomic indicators	185

5 STATES AND MARKETS

Introduction	263
Good governance matters	268
5.1 Credit, investment, and expenditure	271
5.2 Stock markets	274
5.3 Portfolio investment regulation and risk	278
5.4 Financial depth and efficiency	282
5.5 Tax policies	286
5.6 Relative prices and exchange rates	290
5.7 Defense expenditures and trade in arms	294
5.8 State-owned enterprises	298
5.9 Transport infrastructure	302
5.10 Power and communications	306
5.11 The information age	310
5.12 Science and technology	314

Box

5a The World Bank's anticorruption strategy	264
---	-----

Figures

5a Where does corruption occur most in Georgia?	265
5b Microeconomic factors played the biggest part in recent banking crises	268
5.1 Several transition economies rank high in foreign direct investment	271
5.2 The top 10 emerging stock markets in 1997	277
5.10 People in high-income economies still have far better access to telephones	309
5.11 Latin America ranks highest among developing regions in access to personal computers . . . but Europe and Central Asia has the best access to the Internet	313

NEW FEATURES

● Economy includes indicators on merchandise trade that were presented in *Global Links* last year. The Introduction surveys the state of the economy in each of the developing regions and looks at the effects of the global financial crisis.

NEW FEATURES

● The Introduction to *States and Markets* explains why good governance matters in development and presents results from World Bank research on the sources of corruption. Table 5.9 adds data on diesel locomotives.
