Contents

World View has been reorganized to provide better coverage of key international development goals and has been expanded with new tables showing long-term trends in development. Table 1.1 now includes rankings of country performance on total GNP, GNP growth, and GNP per capita. Data for small economies (populations under 1 million) and those with limited data availability are now shown in table 1.6.

1 WORLD VIEW

Introduction	3
International development goals	10
1.1 Size of the economy	12
1.2 Quality of life	16
1.3 Development progress	20
1.4 Trends in long-term economic development	24
1.5 Long-term structural change	28
1.6 Key indicators for other economies	32
Figures	
1a Twelve countries accounted for 80% of the world's poor in 1993	5
1b Global poverty targets will be met if China and India sustain their recent growth	6
1c Countries with high infant mortality in 1970 continue to have high levels today	7
1d As incomes increase, social indicators improve	9
1.1a Population and GNP in selected countries, 1996	15
1.2a Women tend to live longer than men	19
1.4a The world's 30 fastest-growing economies . . .	27
1.4b . . . include many of the fastest-growing service sectors	27
1.5a Agriculture employs a large share of the workforce in many developing countries	31
Text tables	
1a Population living on less than \$1 a day in developing regions, 1987 and 1993	4
1b Progress in social indicators	4
1c Required, actual, and projected regional growth in real consumption	6
1d Infant mortality rates, 1970 and 1996	7
1e Performance gaps and distance to goals	8

People has new tables on employment, unemployment, and reproductive health. The introduction features a special presentation on the worldwide HIV/AIDS epidemic, drawing on recent work by UNAIDS and the World Bank.

2 PEOPLE

Introduction	35
Confronting AIDS	40
2.1 Population	42
2.2 Population dynamics	46
2.3 Labor force structure	50
2.4 Employment by occupation	54
2.5 Employment by economic activity	58
2.6 Unemployment	62
2.7 Poverty	64
2.8 Distribution of income or consumption	68
2.9 Education policy and infrastructure	72
2.10 Access to education	76
2.11 Educational attainment	80
2.12 Gender and education	84
2.13 Health expenditure, services, and use	88
2.14 Access to health services	92
2.15 Reproductive health	96
2.16 Health: risk factors and future challenges	100
2.17 Mortality	104
Box	
2a Social goals and indicators for the 21st century	36
Figures	
2.1a Population growth rates are declining	45
2.2a Population momentum tends to be the biggest contributor to population growth	49
2.3a Children work less as incomes rise	53
2.5a Women's labor force participation depends on how work is defined	61
2.6a Unemployment continues to be high in transition economies	63
2.10a Enrollments are improving, but the school-age population is growing	79
2.12a Gender disparities in education do not respond to changes in GNP per capita	87
2.13a Low-income countries devote relatively less public spending to health . . . than do high-income countries	91
2.17a Child mortality rates show gender discrimination	107
Text tables	
2a Coverage of poverty indicators by region, 1996	36
2b Coverage of net primary enrollment indicators by continent, 1995	37

Environment includes new tables on water pollution and sources of electricity generation. Coverage of air pollution has been expanded. Because of the importance of agriculture for rural welfare and environmental management, indicators on agricultural inputs and production have been moved here. The introduction reports on three big issues for development and the environment: genuine saving, trade in goods from polluting industries, and demand for transport fuels.

3 ENVIRONMENT

Introduction	109
Energy and carbon dioxide emissions	116
3.1 Land use and deforestation	118
3.2 Agricultural inputs	122
3.3 Agricultural output and productivity	126
3.4 Biodiversity and protected areas	130
3.5 Freshwater	134
3.6 Water pollution	138
3.7 Energy production and use	142
3.8 Energy efficiency and emissions	146
3.9 Sources of electricity	150
3.10 Urbanization	154
3.11 Traffic and congestion	158
3.12 Air pollution	162
3.13 Government commitment	164
Boxes	
3a Environmental indicators for the 21st century	110
3.13a The Kyoto Protocol on climate change	166
Figures	
3a Adjusting for environmental costs lowers Ecuador's savings and investment rates	111
3b High-income countries generate more exports from the six most polluting industries	113
3c Trade of the six most polluting industries by region	113
3.1a Arable land per capita in selected countries, 1995	121
3.2a Arable land is no longer expanding	125
3.2b The distribution of fertilizer consumption has changed	125
3.3a Food production has outpaced population growth	129
3.4a Worldwide, the number and coverage of protected areas have increased dramatically	133
3.5a Annual renewable freshwater resources are coming under increasing strain	137
3.5b Agriculture drinks up a lot of the world's freshwater	137
3.7a Since 1980 low- and middle-income countries have seen rapid growth in commercial energy use	145
3.7b Low-income countries are exporting less energy	145
3.8a Carbon dioxide emissions are increasing everywhere	149
3.8b In 1995 high-income countries emitted the most carbon dioxide	149
3.9a Sources of global electricity generation are shifting	153
3.10a Urban populations in developing countries are ballooning	157
3.11a Global production of motor vehicles continues to rise	161
3.12a Most environmental costs of fossil fuel use result from small sources	162
3.13a Projects financed by the Global Environment Facility, February 1995–June 1997	165
Text tables	
3a Genuine savings rates in selected countries	111
3b Export-import ratios for selected countries, 1986 and 1995	112
3c Income elasticity of demand for motive fuels in selected Asian economies, 1973–90	114
3.13a Status of national environmental action plans	164
