|--------------------------------------------------------|-----------|
| <b>INTRODUCTION</b>                                    | <b>1</b>  |
| <b>WHAT THIS BOOK IS</b>                               | <b>1</b>  |
| <b>WHAT THIS BOOK IS NOT</b>                           | <b>1</b>  |
| <b>HOW TO USE THIS BOOK</b>                            | <b>2</b>  |
| <b>A GLANCE BACKWARDS AT THE SYSTEM/370 FAMILY</b>     | <b>2</b>  |
| <b>CHAPTER 1. IBM ES/9000—A NEW BEGINNING</b>          | <b>11</b> |
| <b>THE IBM ENTERPRISE SYSTEM/9000 FAMILY</b>           | <b>11</b> |
| How Do ES/9000 Systems Differ from System/370 Systems? | 20        |
| Model 120/130/150/170/200 Specifics                    | 24        |
| Model 180/190/210/260/320 Specifics                    | 27        |
| Model 440/480 Specifics                                | 29        |
| Model 490/570/610 Specifics                            | 31        |
| Model 330/340 Specifics                                | 33        |
| Model 500/520/580 Specifics                            | 35        |
| Model 620/640/660 Specifics                            | 37        |
| Model 720/740 Specifics                                | 39        |
| Model 820/860 Specifics                                | 41        |
| Model 900 Specifics                                    | 43        |
| Performance Overview                                   | 44        |
| <b>A CLOSER LOOK</b>                                   | <b>48</b> |
| Hardware Architecture                                  | 49        |
| <i>Rack-Mounted ES/9000 Hardware Architecture</i>      | 52        |
| <i>Mid-Range ES/9000 Hardware Architectures</i>        | 56        |
| <i>820/900 Hardware Architecture</i>                   | 60        |
| Storage Hierarchy                                      | 63        |

|                                         |    |
|-----------------------------------------|----|
| Input/Output (I/O) Channel Architecture | 70 |
| Operating Modes                         | 76 |
| <i>System/370 Base Option Mode</i>      | 77 |
| <i>Native System/370 Mode</i>           | 78 |
| <i>ESA/390 Mode</i>                     | 78 |
| <i>ESA/390 LPAR Mode</i>                | 78 |
| <i>Physically Partitioned Mode</i>      | 79 |
| Packaging Technology                    | 80 |

## CHAPTER 2. OPTIONS AND PERIPHERALS 85

---

### DISPLAY STATIONS 86

|                                 |    |
|---------------------------------|----|
| InfoWindow 3471 Display Station | 86 |
| InfoWindow 3472 Display Station | 88 |
| PS/2 Terminal Emulation         | 89 |

### PRINTERS 91

|                                |     |
|--------------------------------|-----|
| 4230 Printer                   | 92  |
| 4224 Printer                   | 94  |
| 4234 Printer                   | 95  |
| 6252 ImpactWriter              | 95  |
| 4245 Printer                   | 97  |
| 6262 Printer                   | 99  |
| 3816 Page Printer              | 100 |
| 3825 Page Printer              | 101 |
| 3835 Page Printer              | 102 |
| 3827 Page Printer              | 103 |
| 3900 Advanced Function Printer | 104 |

### 3174 WORKSTATION CONTROLLERS 105

### PROCESSOR STORAGE EXPANSION 107

|                                                   |     |
|---------------------------------------------------|-----|
| Model 120 through 480 Processor Storage Expansion | 107 |
| Model 490/570/610 Processor Storage Expansion     | 109 |
| Model 330 through 580 Processor Storage Expansion | 109 |
| Model 620 through 740 Processor Storage Expansion | 109 |
| Model 820/860/900 Processor Storage Expansion     | 113 |

### AUXILIARY STORAGE OPTIONS 113

|                         |     |
|-------------------------|-----|
| Disk Storage            | 113 |
| 9336 DASD               | 115 |
| 9340 DASD               | 117 |
| 3990 Storage Controller | 119 |
| 3390 DASDs              | 123 |

|                                                                    |            |
|--------------------------------------------------------------------|------------|
| Tape Storage                                                       | 125        |
| 9347 Tape Unit                                                     | 126        |
| 9348 Magnetic Tape Unit                                            | 126        |
| 3490 Magnetic Tape Units                                           | 127        |
| Optical Storage                                                    | 129        |
| WORM Drives                                                        | 129        |
| Rewritable Optical Drives                                          | 131        |
| <b>COMMUNICATIONS OPTIONS</b>                                      | 131        |
| Communications Interfaces/Protocols—A Road Map                     | 132        |
| Integrated Communications Adapters                                 | 136        |
| Telecommunications Subsystem Controller                            | 136        |
| ASCII Subsystem Controller                                         | 137        |
| X.25 TCP/IP Communications Subsystem Controller                    | 138        |
| Token-Ring Subsystem Controller                                    | 138        |
| 802.3 LAN Subsystem Controller                                     | 138        |
| 3745 Communications Controller                                     | 139        |
| Modems                                                             | 142        |
| 5853 Modem                                                         | 143        |
| 786X Modem                                                         | 144        |
| 7855 Modem                                                         | 145        |
| 5822 Digital Service Unit (DSU)                                    | 147        |
| <b>I/O CHANNEL/BUS OPTIONS</b>                                     | 147        |
| Rack-Mounted ES/9000 I/O Channel/Bus Expansion                     | 148        |
| Air-Cooled Frame ES/9000 I/O Channel Expansion                     | 150        |
| Water-Cooled Frame ES/9000 I/O Channel Expansion                   | 152        |
| ESCON Directors                                                    | 153        |
| 9034 ESCON Converter                                               | 155        |
| <b>OTHER OPTIONS</b>                                               | 156        |
| Battery Backup for Rack-Mounted ES/9000 Systems                    | 156        |
| Vector Facility                                                    | 157        |
| Integrated Cryptographic Feature (ICRF)                            | 157        |
| 9037 SysPlex Timer                                                 | 157        |
| <b>CHAPTER 3. ES/9000 SOFTWARE—BRINGING<br/>THE SYSTEM TO LIFE</b> | <b>159</b> |
| <b>THE SOFTWARE MODEL</b>                                          | 159        |
| Application Programs                                               | 160        |
| Operating Systems                                                  | 162        |
| Licensed Internal Code                                             | 163        |
| How the Layers Work Together                                       | 164        |
