Contents

Nitrogen Catabolite Repression in Yeasts and Filamentous Fungi by JEAN-MARIE WIAME, MARCELLE GRENSON, and HERBERT N. ARST JR.

I. Introduction	2
II. Nitrogen Catabolite Repression in <i>Saccharomyces cerevisiae</i>	4
III. Nitrogen Metabolite Repression in Filamentous Fungi	57
IV. Acknowledgements	78
References	79
Note Added in Proof	88

Sexual Agglutination in Chlamydomonads by H. VAN DEN ENDE

I. Introduction	89
II. The Mating System	90
III. The Mating Process	91
IV. The Specificity of Sexual Agglutination	102
V. Dynamics of Sexual Agglutination	111
VI. Concluding Remarks	119
References	119

The Energy Flow in Bacteria: The Main Free Energy Intermediates and Their Regulatory Role by K. J. HELLINGWERF and W. N. KONINGS

I. Introduction	125
II. The Energy Circuit in Bacteria	126
III. Energy Transduction in the Cytoplasmic Membrane	130
IV. Regulation by Energy Intermediates	138
V. Homeostasis in the Magnitude of Free Energy Intermediates	146
VI. Conclusions and Perspectives	148
VII. Acknowledgements	149
References	150

**Hydrogenase, Nitrogenase, and Hydrogen Metabolism
in the Photosynthetic Bacteria by PAULETTE M.
VIGNAIS, ANNETTE COLBEAU, JOHN C. WILLISON, and
YVES JOUANNEAU**

I. Introduction	156
II. The Organisms	156
III. Hydrogen Utilization and Production by Photosynthetic Bacteria	162
IV. Hydrogenase	174
V. Nitrogenase	190
VI. Genetics of Hydrogen Production and Utilization	204
VII. Use of Photosynthetic Bacteria as Biological Solar Energy Converters	210
VIII. Summary and Prospects	218
IX. Acknowledgements	220
References	220
Note Added in Proof	234

**Biochemistry and Physiology of Bioluminescent Bacteria
by J. WOODLAND HASTINGS, CATHERINE J.
POTRIKUS, SUBHASH C. GUPTA, MANFRED
KURFÜRST, and JOHN C. MAKEMSON**

I. Introduction	236
II. Taxonomy	237
III. Biochemistry	238
IV. Molecular Biology	256
V. Physiology	259
VI. Ecology	269
VII. Analytical and Clinical Applications	274
VIII. Acknowledgements	280
References	281
Note Added in Proof	291
Author Index	293
Subject Index	311
