oreilly.com

oreilly.com is more than a complete catalog of O'Reilly books. You'll also find links to news, events, articles, weblogs, sample chapters, and code examples.

oreillynet.com is the essential portal for developers interested in open and emerging technologies, including new platforms, programming languages, and operating systems.

Conferences

O'Reilly brings diverse innovators together to nurture the ideas that spark revolutionary industries. We specialize in documenting the latest tools and systems, translating the innovator's knowledge into useful skills for those in the trenches. Visit *conferences.oreilly.com* for our upcoming events.

Safari Bookshelf (*safari.oreilly.com*) is the premier online reference library for programmers and IT professionals. Search across thousands of electronic books simultaneously and zero in on the information you need in seconds. Read the books on your Bookshelf from cover to cover or simply flip to the page you need. Try it today for free.

This book is dedicated to my uncle,
Vince Catsoulis

Table of Contents

Preface ..... **xi**

1. An Introduction to Computer Architecture **1**
Concepts 2
Memory 16
Input/Output 20
DMA 20
Embedded Computer Architecture 26

2. Assembly Language **30**
Registers 32
Machine Code 32
Signed Numbers 34
Addressing Modes 35
Coding in Assembly 37
Disassembly 40
Position-Independent Code 41
Loops 41
Masking 42
Indexed Addressing 43
Stacks 44
Timing of Instructions 45

3. Forth/Open Firmware **48**
Introducing Forth 48
String Words 51
Stack Manipulation 52
Creating New Words 54

Comments 56
if ... else 57
Loops 58
Data Structures 61
Interacting with Hardware and Memory 62
Forth Programming Guidelines 64

4. Electronics 101 ..... **65**
Voltage and Current 65
Analog Signals 67
Power 68
Reading Schematics 68
Resistors 73
Capacitors 80
RC Circuits 83
Inductors 86
Transformers 89
Diodes 90
Crystals 93
Digital Signals 98
Electrical Characteristics 99
Logic Gates 108
The Importance of Reading the Datasheet 109

5. Power Sources **110**
The Stuff Out of the Wall 110
Batteries 111
Low Power Design 111
Regulators 112
LM78xx Regulators 114
MAX603/MAX604 Regulators 116
MAX1615 Regulator 117
MAX724 Regulator 118
Electrical Noise and Interference 119

6. Building Hardware **124**
Tools 124
Soldering 129
Quick Construction 136

Printed-Circuit Boards 140
Building It 153
JTAG 157

7. Adding Peripherals Using SPI 160
Serial Peripheral Interface 160

8. Adding Peripherals Using I²C 174
Overview of I²C 174
Adding a Real-Time Clock with I²C 178
Adding a Small Display with I²C 179

9. Serial Ports 180
UARTs 180
Error Detection 182
Old Faithful: RS-232C 183
RS-422 190
RS-485 192

10. IrDA 196
Introduction to IrDA 196

11. USB 203
Introduction to USB 204
USB Packets 206
Physical Interface 208
Implementing a USB Interface 211

12. Networks 215
Controller Area Network (CAN) 215
Ethernet 219

13. Analog 226
Amplifiers 226
Analog to Digital Conversion 229
Interfacing an External ADC 233
Temperature Sensor 235
Light Sensor 237
Accelerometer 240
Pressure Sensors 242

Magnetic-Field Sensor 244
Digital to Analog Conversion 245
PWM 248
Motor Control 249
Switching Big Loads 256

14. The PIC Microcontrollers ... 258
A Tale of Two Processors 258
Starting Simple 260
A Bigger PIC 263
PIC-Based Environmental Datalogger 265
Motor Control with a PIC 271

15. The AVR Microcontrollers ... 277
The AVR Architecture 278
The ATtiny15 Processor 280
Downloading Code 287
A Bigger AVR 289
AVR-Based Datalogger 290
Bus Interfacing 291

16. 68HC11 ... 316
Architecture of the 68HC11 316
A Simple 68HC11-Based Computer 317

17. MAXQ ... 327
Architectural Overview 327
Schematics 329

18. 68000-Series Computers ... 334
The 68000 Architecture 335
A Simple 68000-Based Computer 339

19. DSP-Based Controllers ... 348
The DSP56800 351
A DSP56805-Based Computer 353
JTAG 361

Index ... 363
