

An Introduction to Law

Since the publication of its first edition, this textbook has become the definitive student introduction to the subject. As with earlier editions, the seventh edition gives a clear understanding of fundamental legal concepts and their importance within society. In addition, this book addresses the ways in which rules and the structures of law respond to and impact upon changes in economic and political life. The title has been extensively updated and explores recent high profile developments such as the Civil Partnership Act 2005 and the Racial and Religious Hatred Bill. This introductory text covers a wide range of topics in a clear, sensible fashion giving full context to each. For this reason, *An Introduction to Law* is ideal for all students of law, be they undergraduate law students, those studying law as part of a mixed degree, or students on social sciences courses which offer law options.

PHIL HARRIS is Professor of Legal Education at Sheffield Hallam University.

The Law in Context Series

Editors: William Twining (University College London) and
Christopher McCrudden (Lincoln College, Oxford)

Since 1970 the Law in Context series has been in the forefront of the movement to broaden the study of law. It has been a vehicle for the publication of innovative scholarly books that treat law and legal phenomena critically in their social, political and economic contexts from a variety of perspectives. The series particularly aims to publish scholarly legal writing that brings fresh perspectives to bear on new and existing areas of law taught in universities. A contextual approach involves treating legal subjects broadly, using materials from other social sciences, and from any other discipline that helps to explain the operation in practice of the subject under discussion. It is hoped that this orientation is at once more stimulating and more realistic than the bare exposition of legal rules. The series includes original books that have a different emphasis from traditional legal textbooks, while maintaining the same high standards of scholarship. They are written primarily for undergraduate and graduate students of law and of other disciplines, but most also appeal to a wider readership. In the past, most books in the series have focused on English law, but recent publications include books on European law, globalisation, transnational legal processes, and comparative law.

Books in the Series

- Anderson, Schum and Twining: *Analysis of Evidence*
Ashworth: *Sentencing and Criminal Justice*
Barton & Douglas: *Law and Parenthood*
Beecher-Monas: *Evaluating Scientific Evidence: An Interdisciplinary Framework for Intellectual Due Process*
